

Attendance API Specification for SGT School

This document defines the REST API endpoints required by the mobile application to manage student check-in, check-out, and display monthly summaries and calendar records.

1. Retrieve Attendance Records & Summary

Retrieves the monthly check-in/out records and summary statistics (Present, Absent, Late counts) for a specific student.

```
* **Method:** `GET`
* **URL:** `/api/v1/students/{student_id}/attendance`
* **Headers:**
  * `Authorization: Bearer <token>`
* **Query Parameters:**
  * `month` (optional, format `YYYY-MM`, e.g., `2026-06`. Defaults to current month if not passed).
```

Success Response (`200 OK`)

```
```json
{
 "success": true,
 "message": "Success",
 "data": {
 "summary": {
 "present": 17,
 "absent": 1,
 "late": 4
 },
 "records": [
 {
 "date": "2026-06-01",
 "status": "present",
 "check_in": "08:45:00",
 "check_out": "16:30:00"
 },
 {
 "date": "2026-06-02",
 "status": "present",
 "check_in": "08:50:00",
 "check_out": "16:45:00"
 },
 {
 "date": "2026-06-03",
 "status": "present",
 "check_in": "08:35:00",

```

```

3. Check-Out Action

Dispatches a check-out event for the student. The backend should automatically locate the active check-in record for today and update its `check\_out` field with the server time.

```
* **Method:** `POST`
* **URL:** `/api/v1/attendance/check-out`
* **Headers:**
  * `Authorization: Bearer <token>`
  * `Content-Type: application/json`
```

Request Body

```
```json
{
 "student_id": 147
}
```
```

Success Response (`200 OK`)

```
```json
{
 "success": true,
 "message": "Checked out successfully",
 "data": {
 "id": 105,
 "student_id": 147,
 "date": "2026-06-04",
 "check_in": "09:15:00",
 "check_out": "16:45:00",
 "status": "late"
 }
}
```
```

Attendance Status Enums

The `status` field in the daily detail records maps to the following string keys:

- * `"present"` – Student checked in on time.
- * `"absent"` – Student has not checked in for the day (determined by backend schedule checker).
- * `"late"` – Student checked in past the start time threshold.
